THERMOGEL
Comfort

THERAPY
HOT COLD

The safe, comfortable
hot and cold therapy

The hot and cold therapy

An **effective**, irreplaceable technique
for healthcare and sports **therapy**.

Cold therapy

Relieves painful conditions accompanied by swelling and inflammation:

- **Relieves** muscle spasm, traumatic **pain**, acute **inflammation** and can induce a mild local anaesthetic effect
- May be useful to control bleeding: **reduces local blood flow** by 50% after 10 minutes.

WHEN TO USE

- ❄ Recommended for small contusions, microtraumas (muscle strains, sprains and dislocations) and minor bleeding.
- ❄ Calms headache and toothache.
- ❄ Soothes localised skin inflammation.
- ❄ Indicated for insect stings.

Hot therapy

Heat is one of the oldest methods to relieve pain and treat contractions and spasms. The application of heated pads which release heat gradually over time can:

- **Reduce joint stiffness**
- **Relax** muscle **spasms**
- Provide an **analgesic effect**
- **Improve** blood **circulation**.

WHEN TO USE

- ☀ Recommended for lumbago, sciatica, muscle and abdominal pain.
- ☀ Indicated for stiff muscles and rheumatic muscle pain.
